

## **REMERX Ltd. changed appearance**

In the REMERX company were all buildings equipped with new plastic windows and with sheathing from polyurethane panels.

These modifications improved storage and expedition options but also improved manufacturing conditions because buildings are better insulated and inside is better lighting. Storage areas are equipped with modern technology which help to our customers dispatch orders as soon as possible. Of course taking place improving the quality of wheels, rims, hubs, spokes and anodizing products.
